

Integrated Science Lesson: 20%

Integrate the lesson you develop with other subjects (i.e., language arts, social studies, mathematics, or visual arts). You have the option of submitting this assignment individually or in a group in order to create a unit (with peers teaching the same grade).

Refer to the lesson plan template on the course website for guidance. Once you complete the lesson, individually write a reflective paper that addresses the following questions:

- What did you learn about yourself as a teacher during the development of this lesson plan?
- Why is it important for your students to participate in this lesson?
- How does this lesson fit within your idea of yourself as a science teacher and your beliefs about teaching and learning?
- Do you see a difference, an advantage, or incentive to the use of inquiry learning? Explain.
- Any other thoughts or reflections on the process of lesson planning.

Please refer to the corresponding rubric on the course website for more details concerning the assessment of this assignment.
